

TV Mirrors

Despite the growing popularity of online streaming services, the TV still plays an important role in households across the world. However, families and homes have changed and people no longer want the television to play such a dominant focal point in their home.

Our TV Mirrors allow you to combine style and entertainment in one. The sleek look of our finely-crafted TV mirror with the vivid colors of your high-performance television. When off, the television vanishes without a hint of **its technical applications**. **Don't settle for a traditional television that distracts from your carefully designed interior.** Now consumers can enjoy the high-performance technology of the Television with the invisibility you want.

The power of Ultra

Our Ultra TV Mirror means putting the television brightness first and mirror reflectivity second, with the Ultra, this TV mirror has a grey tint that allows a bright and vivid TV image to shine through. The Ultra TV mirrors provide a crisp television image and, when turned off, a fashionable mirror remains. Our Ultra TV Mirror technology performs best when used in environments with little to no natural daylight that can cause glare and reduce the television's brightness appearance.

Enhanced Power of Ultra Plus

Using advanced glass coating technology for enhanced optical transmission that provides better visual **comfort in Monitor's Televisions and Displays**. **Giving even better bright and vivid images to shine through** but without the compromise on the mirror with reduced distraction caused by high absorption in regular high reflective glasses as well as removing the dark aspect so familiar in many of these types of mirrors.

Reflective Ultra Silver TV Mirror

Our Reflective Ultra Silver TV mirror has been designed as an alternative option for those who seek a high level of reflectivity. This TV mirror still allows your TV to come through it but gives a better standard mirror reflection that you would expect with a normal mirror and virtually no tint.

Safety First

Ideal option for providing peace of mind when necessary.

Our Ultra Plus two-way mirror can be tempered and processed into laminated safety glass.

Our Acrylic TV mirrors are ideal for smaller televisions where safety takes the priority. 17 times stronger than glass alternatives, this shatter resistant TV mirror is ideal for use in bedrooms, bathrooms and around children.

Customize your size.

We have made it easier than ever to find the right size to fit your needs. Choose from Plain mirror options through to our large selection of frames including contemporary, decorative, and antique styles.
